

Belarmine Physical Therapy & Sports Injury Clinic

Description:

At Belarmine Physical Therapy Clinic, our client centred, holistic approach to sports and orthopaedic injuries has proven to be very effective in restoring pain free function and preventing future injuries. We not only use our knowledge and experience to treat your symptoms, but provide a complete assessment to determine and correct the underlying factors that may have caused your injury. The goal of our physical therapists is to treat pain and restore complete function and mobility.

Our physical therapists understand the mechanisms of injury and the forces acting on the body during sport through on field sports coverage, specific sports rehabilitation courses, and a daily exposure to orthopaedic conditions. We have experience of treating people from all walks of life from professional and Olympic athletes to old age pensioners. We apply this experience to all clients to allow them to safely return to a pain free active lifestyle.
